

NCS DECLARATION OF SECURITY (DoS)

Between petroleum installations on the Norwegian Continental Shelf (NCS) and ISPS certified vessels serving such installations

To be used in conjunction with the petroleum installation's ISPS Bridging Document

Name of vessel:	
Port of Registry:	
IMO Number:	
Name of Petroleum installation:	
Operator of Petroleum installation:	

This Declaration of Security is valid from ___/___/___ until ___/___/___ (dd/mm/yy, max one year) for the following activity:

Loading and unloading of cargo and/or personnel

under the following security levels:

Security level(s) for the ship:	
Security level(s) for the Petroleum installation:	All levels unless otherwise specified by the Continental Shelf Designated Authority

The signatures attached to this Declaration of Security by the Master and the Ship Security Officer (SSO) on behalf of the ship, and by the Offshore Installation Manager (OIM) and the Petroleum installation security co-ordinator on behalf of the petroleum installation, indicate that the activities listed in the Activity Matrix will be undertaken in accordance with relevant approved plans and procedures, to ensure that the ship complies with applicable requirements of Part A and Part B of the International Code for the Security of Ships and of Port Facilities.

Activity Matrix	The petroleum installation	The ship
1. Ensuring the performance of all security duties as specified in the Ship Security Plan and the petroleum installation's ISPS Bridging Document	◆	◆
2. Ensuring that only authorised personnel are onboard the petroleum installation at any time	◆	
3. Ensuring that only registered personnel enter and leave the ship by transfer basket	◆	◆
4. Monitoring the 500 m exclusion zone for unauthorized traffic according to requirements in the Petroleum activities act, §9-4.	◆	
5. Visually inspecting cargo to be unloaded from the petroleum installation for foreign objects	◆	
6. Sealing closed cargo containers and installing seal number and container number on the cargo manifest before containers are unloaded from the petroleum installation	◆	
7. Checking seals for integrity, according to SSP requirements		◆
8. Ensuring that security communication is readily available between the ship and the petroleum installation	◆	◆
